BACKUP POWER CONSUMER DISCLOSURE FORM
Backup Power for Home Phone Services during Power Outages For many years, your home phone would allow you to stay connected to emergency voice services during a power outage. However, today’s advanced home phone services are provided using fiber optics that require an electrical connection. These advanced home phone services come with battery backup power when installed that should provide approximately 2 hours of phone service in case of an outage. This is not talk time, but extended service time to enable you to contact emergency services if needed. However, as with all batteries, the shelf life is subject to deteriorate over time. To avoid a disruption of home voice service during an outage at your home, and to maintain the ability to connect to 911 emergency services, we offer you the option of purchasing extended backup power for your home phone service. If you have any questions or want to purchase a backup battery through us, please call 269-746-4411. Price: $199 Install: $105 initial install of equipment

WHAT YOUR BATTERY CAN – AND CAN’T – DO FOR YOU
The backup batteries for communication services allow you to continue to use your home voice services during a power outage. Without a backup battery or alternate backup source such as a generator, customers will not be able to make any calls, including emergency calls to 911. The only way to maintain the ability to use your phone is by using some form of backup power. This backup battery does not provide power to any services other than telephone service. Home security systems, medical monitoring devices, cordless telephones, and other equipment will not run on a home phone backup battery.

EXPECTED BACKUP POWER DURATION
Backup batteries are expected to last at least 8 hours on standby power. This is NOT talk time. It is only the ability to contact 911 emergency services. Battery age, maintenance and other factors will determine the extent of actual back up power.

INSTRUCTIONS FOR PROPER CARE AND USE OF YOUR BATTERY
Please follow the more detailed instructions included with your battery for warranty, proper use, storage and care of your battery to ensure that it will function as needed during a power outage.

All questions and issues with the battery need to be directed to the manufacturer.
